

UPCManager® is a full featured UPC collection and management application supporting the latest Food and Nutrition Service (FNS) and National UPC Database (NUPC) standards. The application makes your collection process easier through an intuitive interface and industry standard design. UPCManager® supports the widest array of existing PC hardware and screen resolutions making it a ready to run solution for your WIC Program.

The screenshot displays the UPCManager application window. The title bar reads "UPC UPCManager". The main header area includes the "UPC Manager" logo, the text "Your WIC Agency", and a user greeting "Hi Gary". Below the header is a navigation menu with tabs for "UPCS", "VENDORS", "UTILITIES", and "SETTINGS". A toolbar contains icons for "Refresh UPCs", "Filter UPCs", "Add UPC", "Export to Excel", and "Sync". A search box labeled "Find UPC/PLU" is present. The main data area is a table with the following columns: UPC/PLU NUMBER, CAT, SUB, BRAND NAME, PRODUCT DESCRIPTION, UOM, PKG SIZE, BENF QTY, BROAD -BAND, and STATUS. The table contains five rows of data, with the first row highlighted in yellow. At the bottom of the window, it states "6,824 UPC/PLUs loaded." and "Copyright 2019 ©".

UPC/PLU NUMBER	CAT	SUB	BRAND NAME	PRODUCT DESCRIPTION	UOM	PKG SIZE	BENF QTY	BROAD -BAND	STATUS

Primary UPC Screen

## Features

- UPC and shelf price collection
- Vendor monitoring
- Comprehensive shelf price and not-to-exceed (NTE) reports and file exports for easy loading into MIS
- User and role based security
- Collects NUPC database required fields
- Creates NUPC and all MIS upload file formats
- Multi-user data synchronization via FTP (external) or shared network drive directories (internal)
- Exports UPC and vendor tables to Microsoft Excel for analysis and reporting
- Supports hand-held scanner input with search and auto-add capabilities
- Converts UPC-E to UPC-A during data entry
- Accepts 13 and 14 digit UPCs
- Current, customizable category and subcategory tables with unit of measure, package size, short description and exchange size defaults
- Industry standard produce Price Lookup Codes (PLUs) included
- Displays vendor details including contacts, peer group, APL type, and directions to stores using Google maps
- Filters on UPC and vendor database fields for quick organization
- Database utilities for backup and restoration including the capability to run custom SQL commands
- Designed for laptops and tablets running Microsoft Windows® 7, 8, or 10 (32bit or 64bit). Uses the royalty free Microsoft Access database engine
- Compliant with FNS standards and requirements
- Customizable for your WIC Program

The UPC/PLU Detail dialog displays collected information for the selected UPC or serves as the data entry screen for new UPCs.

Data collectors scan the UPC with an attached scanner or manually key the number.

UPCManager® converts any non-standard UPC number to the universal UPC-A format.

Administrative fields are partitioned and only available to authorized personnel.

The Vendor Detail dialog displays information on the selected vendor. The dialog shows the store general demographics, contact information, store characteristics, peer group criteria including RUCA codes, and store visit/monitoring information.

The store location is displayed on a map with driving directions provided via the Google® maps.

### Filtering and Utilities

UPCs and stores can be filtered by a variety of criteria including Category, Subcategory, Authorized or Unauthorized, APL Type, UPC or PLU only, Store Owner, or County allowing quick editing and data organization.

Utilities include mass data updates, backup, restore, upload to the MIS or NUPC systems, multi-user
